Pacifique Sud ingredients

Research & development

SOURCING IDEAS, DEVELOPING EMOTION

PSi handles distribution and provides consultation services specialized in raw materials from the South Pacific. Its customized screening and extraction processes encourage the development of original ingredients for the personal care and nutraceutical industries, formulas which combine science with emotional insights.

Pinctada margaritifera
Tuamotu archipelago

International distribution

BRINGING TAHITI WITHIN REACH OF YOUR DESIRES

Operating from a site in the South of France and backed by its distribution network, PSi works with the leading brands in more than 25 countries worldwide. PSi's operational platform makes a point of always having samples available for its customers, together with regular and dependable supplies as well as packaging adapted to their needs both in terms of quality and quantity.

Technical assistance

SUPPORTING NEW INGREDIENT FORMULATION

PSi products are supported by extensive ethno-botanical, technical, regulatory and marketing information as well as formulation assistance.

Morinda citrifolia
Tahiti Island

Beauty & food ingredients from Paradise

**VANILLA FROM TAHA'A, PINK SAND FROM
TIKEHAU, TAMANU FROM THE SOCIETY
ISLANDS...**

Each ingredient takes you to a distant destination, each raw material is an experience of all the senses, the promise of original molecules with unique properties and unprecedented benefits.

As a source of ideas and a developer of emotions, P*Si* stimulates the imagination of researchers and scientists defining the beauty and well-being products of tomorrow.

Inspired by the Maohi tradition, tailored to your needs

Natural extracts

DELIVERING ORIGINAL SUBSTANCES
FROM UNIQUE NATURAL SOURCES

Nature develops complex molecular structures with outstanding properties. For more than 2,000 years, Polynesian plants have been the sole source of medicinal preparations used by the Maohi people. Tamanu, Frangipani, Kau Pe, Noni or blue Ageratum are now raw materials carefully selected by P*Si* to design active ingredients delivering their properties in advanced beauty and wellness formulas.

P*Si* develops hydrodistillates, hydroglyceric extracts, alcoholic extracts and also floral, lagoon and volcanic waters.

Their exclusive dried extracts are obtained by atomisation or zeodratation processes with application in nutraceuticals as well as cosmetics.

Vegetable oils

EXPRESSING THE ESSENCE,
DELIGHTING THE SENSES

P*Si* fine-tunes extraction techniques to offer different grades of vegetable oils. Cold expression followed by filtration and physical purification techniques produce high quality virgin oils with rich aromatic profiles (Tamanu, Coconut milk oil).

Stripping under vacuum allows an efficient deodorization of Tamanu oil while preserving its composition in active principles. Sonication on oily substrate is used to extract the lipophilic molecules of Roucou (Oceania Saffron) or Tahitian Vanilla...

Vanilla tahitensis
Taha'a Island

Monoï and Monoï Butters

EXPLORING THE ART OF
TAHITIAN BEAUTY OIL

A classic in P*Si* catalogue and in personal care, Monoï de Tahiti is precisely defined by an Appellation of Origin as the product obtained by enfleurage of fresh Tiare Tahiti flowers in Polynesian Coconut oil.

But Monoï is also the starting point of original Monoï collections imagined by P*Si* - new monoï oils drawing inspiration from Polynesian traditions and casting original plants and herbal blends such as the Umuhei from the Marquesas islands, Pineapple from Moorea, Noni fruit, Sandalwood, brown Algae from the lagoons (AlgoMonoï), Tahitian Vanilla or Rea Tahiti.

Natural powders

FORMULATING MAGIC BODY SCRUBS
WITH EXOTIC POWDERS

White sand from Bora Bora, pink sand from Tikehau, Black volcanic sand, Tahitian pearl, mother of pearl, Coconut shell, Tamanu nut, Vanilla powder...

Pacific powders enchant body scrubs offering the skin the most delicious exfoliating indulgence imaginable. The micronised natural material combines with beauty oils or melting gels to make the skin soft and radiant.

Calophyllum inophyllum
Society Island

Discovering new vegetable substances

With 62% of endemic vegetable species, Polynesia is an incredible source of biodiversity. Recent studies have identified closed to 200 plants with medicinal properties. Fewer than a dozen are currently exploited for application in the health and beauty industries.

sourcing and production, **LABORATOIRE DE COSMÉTOLOGIE DU PACIFIQUE SUD**

With its associate company, the Laboratoire de Cosmétologie du Pacifique Sud (LCPS), PSI is able to rely on a sourcing and development organization which guarantees the quality of its products and the dependability of its supplies.

Over more than 15 years, LCPS has developed a comprehensive approach to the plants of the Polynesian traditional Pharmacopoeia. ISO 9001 version 2000 certified, the laboratory researches and perfects the most appropriate extraction methods to supply its partners with raw materials or ingredients complying with the various technical needs and regulations in the food and cosmetic industry.

LCPS equipment in Tahiti includes:

- Stainless tanks
- Tangential flow filtration unit
- Stainless and Steel presses for fruit juices or vegetable oils
- Pasteurization unit
- Integrated control laboratory
- Packing unit

Plant materials are sourced in the 5 archipelagos of French Polynesia where the laboratory has built sustainable partnerships with local producers - successful associations backed by ongoing training and a passion for innovation.
